

## Frequently Asked Questions In-Use Off-Road Diesel Vehicle Regulation

### Exhaust Retrofits Purchased with Incentive Funding

**Q – If I received funding for purchasing my exhaust retrofit, can I still get credit for it? Can I get double credit?**

**A –** Some fleets have received funding for exhaust retrofits through the following programs: the Off-Road Diesel Retrofit Showcase (Showcase), Supplemental Environmental Projects (SEPs), Carl Moyer funding programs, and Incentives for the Purchase of Low-Polluting Construction Equipment for Public Agencies.

Fleets may always count all verified Level 2 and 3 retrofits in their off-road regulation fleet average calculations, regardless of whether or not the retrofits were paid for using incentive funding. Fleets can also use the retrofits to comply with the particulate matter (PM) Best Available Control Technology (BACT) portion of the off-road regulation. If retrofits are purchased in time to receive double credit, depending on the restrictions of the individual incentive program, fleets may also be able to claim early double credit for the retrofits.<sup>1</sup> Due to contract restrictions, some programs allow only single credit, even if the retrofit would otherwise receive double credit. The table below provides a summary of the type of credit available through each program.

---

<sup>1</sup> More general information about early credit for installation of retrofits and other actions may be found in these documents:
